

# Boknäs Classic

Built from modules, configurations can be perfectly tailored according to your needs and the available space. Extend upwards or along the adjacent wall with corner pieces. Also the dimensions of shelf modules can be customised. The ingenious structure protects your collections from dust.

## FINISHING TOUCHES WITH CROWN MOULDING

Crown moulding needs to be added to the top module. Boknäs Classic modules are available in 14 different colours.

## EXTEND UPWARDS

You can stack as many elements on top of each other as space allows. Modules can also be placed above doorways or extended around the corner along the adjacent wall.

## DRAWERS FOR EXTRA STORAGE

Add drawers between shelves. You can also stack a number of drawers on top of each other, modifying the height of the configuration.

## COMBINE DIFFERENT DEPTHS

You can place elements of a depth of 31 cm on top of a 39 cm deep element. You can also integrate a desk unit or bar into a shelf. Cabinets are available with LED lighting.

## ADD VARIETY WITH DOORS

Filing cabinets are available with a lifting door or pair of doors. Maximise storage space inside a cabinet by adding a shelf.

## START WITH THE BASE

The base can be replaced with a leg base or hidden base. The hidden base conceals additional storage space.

## COMBINE HEIGHTS

Cabinet elements are available in three different heights - 31 cm, 36 cm and 47 cm. Mix them up to create variety.

# Durable wood through proper care

A natural, unique wooden piece of furniture creates a striking and durable partner. Removing dust is almost all the care that is needed.

## A unique partner

Uneven texture, colour variation and minor cracks are all part of the nature of wood. The differing shades are a result of colour variation in the surface of the wood. Colour is also affected by whether the piece is from sapwood or heartwood, the time of year the tree was cut down and the drying method.

## Correct placement

Wooden furniture does not tolerate strong moisture and temperature fluctuations. Excess moisture may cause it to bend or crack and result in open glue joints. The UV rays of the sun can cause colour changes on the surface of the wood. All Boknäs furniture is intended solely for indoor use.

## Good riddance to dust

Dusting furniture with an anti-pilling, moist cloth is all the basic care that is needed. Dusting with a dry cloth may scratch the surface. If using detergents, always test the product on an unnoticeable spot in advance. To polish a piece of furniture, apply the polish to the entire treated area

and wipe off any excess product. Polish with a circular motion with a dry cloth or according to the instructions on the package. Different types of products may harm the surface. When cleaning glass doors, avoid any glass cleaners that contain ammonium, as they may result in a dull finish.

## Getting rid of stains

Remove coffee, alcohol or juice stains immediately, as they may get

stuck to the surface already within an hour. First try removing the stains with clean water and a cloth. You can also use products designed for cleaning furniture, such as a general-purpose cleaning solution. White spirit solvent can be applied to water-insoluble stains. Do not use any other type of solvent. Finish off by wiping the surface with a clean cloth moistened with water.

## Protect from scratches

Abrasives, harsh cloths and cushions damage surfaces and may cause variation in shine. Also strong alkaline and acidic detergents damage varnished surfaces. Use furniture waxes in moderation. Surfaces may get damaged when removing layers of wax. Also nail polish removers, perfumes and hairsprays containing solvents damage varnished surfaces.

## Shield from heat

Make sure to use thick enough protection under hot, cold or moist dishes. Dishes placed directly on the surface may leave a white ring. Furniture should be moved by lifting. Dragging along the floor puts pressure on joints and loosens them.

# Tailored to Your Wishes

Add Boknås Classic pieces to house your book collection or a place for your TV, or create an office area that is easily concealed behind doors. The dimensions of modules can be customised.

## STACK ON TOP

A piece can be extended upwards with elements of the same width. You can add a drawer in between to spice up shelf modules. A bar element is also available, which can be fitted with a desk unit.

## MAKE USE OF DIFFERENT HEIGHTS

You can combine cabinets of different heights - 31 cm, 36 cm or 47 cm.

## EXTEND SIDEWAYS

Build the lower part using cabinets or drawers or making use of both.

## PLAY WITH DEPTH

Stack narrower elements on top of a wide base. Both the bar element and desk unit fitted inside the bar is available with a depth of 31 cm.

## FINISH OFF WITH A TOP

You can add a top or lid to a low element. Crown molding adds the finishing touches to top units.

## BUILD ON TOP OF THE BASE

You will need to fit the lower part with a base or hidden base that doubles as additional storage space. A leg base is another alternative.

## MAXIMISE STORAGE SPACE

Shelving maximizes the storage wspace of cabinets.

**Colour with a Difference**

Boknäs Classic furniture comes in 14 colour options. Shelf system elements are also available as shortened versions, meaning that creating unique, tailored fittings is easier for any space. In addition to assembling shelf and furniture configurations from elements of your choice, you can also get creative with colour. A piece of furniture in a single colour is always a stylish option, but also different shades can be blended together. Colour plays a stronger role the larger the unit. An intense colour transforms a piece into an eye-catcher in an instant.

**Alone or Together**

When selecting the right shade, consider the colours of other pieces in the same space. Make the most of each piece of furniture by ensuring colours blend seamlessly together. Everything does not have to come in the same shade of wood, but a narrower palette does create a tranquil ambience. White works with all other hues. A varnished surface accentuates the natural texture of wood. Mid-brown, dark brown, birch, woodwash, rosewood and oak are all tones that reveal the wood grain beautifully. A combination of wenge and oak works nicely, as does snow white and oak.

# Finnish Brand Built to Last

**B**oknäs is a Finnish family-owned company founded in 1996. It all began as an antiquarian bookshop in the Töölö area of Helsinki and the needs of the bookshop owners and their customers to store their ever-increasing book collections.

The Boknäs selection and service model of today is built on the foundation of old books, history and lasting values. We strive to offer high-quality, unique interior solutions that grow and adapt as needs change.

Boknäs stores are comprehensive interior department stores. Special attention is paid to creating beautiful displays and an inviting feel. The ambiances handpicked from different cultures and styles provide plenty of inspiration to take home. We are more than happy to seek the right solutions for both private homes and public spaces.

Boknäs operates internationally. Our partners share our values and ideology. In choosing new products, we always pay attention to genuine materials, premium quality and durability. It is important for us and our customers that the selection is long-lasting and products are available also in the future.

The brand was inspired by turtles and the values they kindle. A turtle is like the core of a home. It carries its home and feels at home wherever it goes. Like us, a turtle is a globetrotter, always on the lookout for the next challenge.

A turtle represents a search for one's limits and respecting the limits of others, developing new ideas, self-confidence and longevity. It symbolises happiness and long life. It is pretty difficult to shake up a balanced tortoise. In feng shui, the number of patterns on a turtle's shell is associated with elements of life, such as health, family, children and work. Striking a balance between the elements creates a fulfilling life and happy home. A turtle always finds its way home.
