

Boknäs Scandic

Furniture built from Boknäs Scandic modules adapts and extends upwards and sideways as needs change.

FINISH OFF WITH CROWN MOLDING

The crown molding is available in 7 colour options. If you place a 140 cm wide cabinet on top, also the molding needs to be 140 cm wide.

DIFFERENT DEPTHS

Narrower elements can be placed on top of wider elements. Small cabinets can also be replaced with a 140 cm wide unit. Choose between wood, slat or glass doors. Cabinets are also available with lighting. The backboard comes in a range of colour choices.

EXTEND SIDeways

Sets of drawers are available with a depth of 39 cm and width of 70 cm. The set of drawers can be replaced with a cupboard. Sets of drawers and cupboard need to be equipped with legs and a top. All of the elements are available in different colour options.

MAKE USE OF SHELVES

Internal shelving in wood or glass is available for the cabinets. You can choose between different colours and the option of lighting.

ADJUST THE HEIGHT

Two magazine shelves can be placed above the chest, changing the overall height of the configuration. You can also modify the height of the cabinets.

STACK ON TOP

You can assemble a configuration using just cabinets or why not stack several sets of drawers above each other. The wider set of drawers is also available at a height of 46 cm.

CHEST OR CABINET?

The chest below can be replaced with two 70 cm wide cabinets, which will change the overall height. Alternatively, go for a single 140 cm wide cabinet below. Cabinets with glass doors also come with LED lighting. Cabinets and chests need to be fitted with legs or a base.

HIGHLIGHT THE LEGS

Change the overall look by opting for legs in one of the 7 colour options.

Tailored to Your Wishes

Furniture assembled from different elements offers a range of alternatives to suit your wishes. Change the look with different types of doors, depths and colours, and make use of narrower and wider elements.

PICK AND MIX

The lower part of the cabinet is assembled from two large cabinets. They can be switched for a single, 140 cm wide cabinet available with either glass or wooden doors. Alternatively, place a taller cabinet with glass doors below. The cabinet should be fitted with legs or a base. This example comes in a colour pair of wenge-oak. You can choose from 7 different colour options.

GLASS OR WOODEN DOORS?

You can also choose wooden doors for the lower cabinet. Cabinets with glass doors are available with lighting. Or why not replace the lower cabinets with drawers or cupboards.

EXTEND SIDEWAYS

Extend the unit sideways with cabinets with wooden or glass doors. You can also add a small or large chest of drawers or another cupboard next to the cabinet unit. As needs change, you can extend upwards.

ADD PRACTICAL SHELVING

Additional shelving is available for cupboards and cabinets. Choose between wooden and glass shelves. Both come with the option of lighting.

PLAY WITH DEPTH

You can assemble a piece from elements of the same size or play with different depths. Add 31 cm deep elements on top of a 39 cm cabinet, cupboard or chest of drawers. You can also opt for two small drawers under narrow cabinets.

HIGHLIGHT THE BACKING

You can choose the backboard from a range of 7 different colours.

SPICE IT UP WITH DRAWERS

You can place 140 cm wide sets of drawers or two 70 cm wide sets of drawers between the cabinets. A magazine shelf is another option between the cabinets.

FINISH OFF WITH MOLDING

If you opt for two separate cabinets on top, you will also need two separate crown moldings. For a 140 cm element on top, always choose a crown molding of the same width. If space isn't an issue, you can always extend upwards later on.

Colours

Splash of Colour

Boknås Scandic furniture is mainly crafted from birch. The range is available in seven colour options. Combining different modules and colours allows to create a functional solution for any space and need. Woodwash, dark brown and oak particularly highlight the unique character of wood resulting from its grain and colour variations.

IN-STOCK COLOURS

11
SNOW WHITE

Perfect Match

A combination of dark grey and white forms a perfect match in the Boknås Scandic range. Also wenge and oak create a stunning pair. If you are after a more neutral, basic palette, combine white with wood-coloured, black or grey legs or add an accent colour to the backboard of a cabinet. You can also disguise a colourful surprise inside a wardrobe by opting for one of the elements in some other colour.

Finnish Brand Built to Last

Boknäs is a Finnish family-owned company founded in 1996. It all began as an antiquarian bookshop in the Töölö area of Helsinki and the needs of the bookshop owners and their customers to store their ever-increasing book collections.

The Boknäs selection and service model of today is built on the foundation of old books, history and lasting values. We strive to offer high-quality, unique interior solutions that grow and adapt as needs change.

Boknäs stores are comprehensive interior department stores. Special attention is paid to creating beautiful displays and an inviting feel. The ambiances handpicked from different cultures and styles provide plenty of inspiration to take home. We are more than happy to seek the right solutions for both private homes and public spaces.

Boknäs operates internationally. Our partners share our values and ideology. In choosing new products, we always pay attention to genuine materials, premium quality and durability. It is important for us and our customers that the selection is long-lasting and products are available also in the future.

The brand was inspired by turtles and the values they kindle. A turtle is like the core of a home. It carries its home and feels at home wherever it goes. Like us, a turtle is a globetrotter, always on the lookout for the next challenge.

A turtle represents a search for one's limits and respecting the limits of others, developing new ideas, self-confidence and longevity. It symbolises happiness and long life. It is pretty difficult to shake up a balanced tortoise. In feng shui, the number of patterns on a turtle's shell is associated with elements of life, such as health, family, children and work. Striking a balance between the elements creates a fulfilling life and happy home. A turtle always finds its way home.
